

MACHINING PROCESS ENGINEERING

"Plug and produce" guarantee

- ↳ Production 100% internalised
- ↳ Hydraulic systems experts
- ↳ +than 100 machining fixtures / year
- ↳ Hydraulic test bench

Mechanical and mechatronic engineering (research in robotics, innovative process and products, technical calculations, process design)

Mechanical and mechatronic engineering (research in robotics, R&D process and innovative products, sizing calculations, design of production means, subcontracting and manufacturing management, manufacturing and assembly)

M-Tecks EAC is approved Research Tax Credit and Innovation Tax Credit by the General Directorate for Research and Innovation.

EXAMPLES OF ACHIEVEMENTS

- Manufacture of machining fixtures of all sizes for multiple sectors
- Vibration behaviour analysis for the choice of anti-vibration mountings
- Calculation of cutting forces
- CAM kinematic simulation with machine tools environment
- Mutli-version parts with interchangeable blocks
- Hydraulic clamping of drilled circuit / Manual campling

- Defence
- Aeronautics
- Automotive
- Industry
